PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience engineering enterprise-scale solutions and driving global product design. Proven track record of leading end-to-end delivery for complex, cross-regional services. A strong communicator and technical leader who thrives in fast-paced environments, consistently delivering innovative, high-impact software.

EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEER II | **AMAZON** | Virginia, United States — Apr 2025 – Present

- **Led a cross-functional initiative** to design and deploy a **Bulk orchestration service** within the Candidate Application Management Platform (**CAMP**), enabling external vendors to onboard seamlessly onto global hiring services using standardized Indian HBA operational formats.
- **Proposed, planned, and executed the deprecation** of legacy India HBA hiring services, successfully migrating operations to the global HBA platform as part of a strategic, organization-wide consolidation of regional hiring models.
- **Architected a dynamic UI layout engine** using static JSON and AppConfig on CAMP, accelerating new country launches to **under 7 days** and streamlining global profile modifications, additions, and deletions.
- **Optimized candidate-merge workflows** by re-engineering AWS Step Functions to resolve complex, cross-country duplicate data merge logic during international expansions.
- **Designed and deployed a specialized AI on-call agent** integrated with an internal knowledge base and Retrieval-Augmented Generation (**RAG**) system, driving a drastic reduction in engineering ticket resolution times.
- **Leveraged generative AI and AWS Step Functions Distributed Map** to implement automated bulk orchestration features on CAMP, reducing the deployment time for new hiring roles to **under 24 hours**.

SOFTWARE DEVELOPMENT ENGINEER II | **AMAZON** | Bangalore, India — Oct 2023 – Apr 2025

- **Led the architecture and design** of the **Pre-Hire Orientation (PHO)** platform, an interactive, multimedia knowledge-sharing quiz that educates applicants on job roles, compensation, and transportation logistics.
- **Directed a team of consultant engineers** on frontend enhancements and core system updates, successfully reducing early attrition within the first week of joining and **saving Amazon millions of dollars** across all India sites.
- **Designed and built Multi-Language Support (MLS)** for Indian regional languages by implementing internationalization (**i18n**) standards and leveraging Panther translation tools to enhance candidate accessibility.
- **Spearheaded a security initiative** across all India **Hire by Amazon (HBA)** services by implementing **AWS WAF rules**, resolving security scans, enforcing **PII data masking**, and upgrading public APIs to run continuous vulnerability scans.
- **Onboarded India HBA services** to the global data lake, establishing a secure retrieval schema that enables agencies and vendors to query data seamlessly via **Amazon Athena**.

SOFTWARE DEVELOPMENT ENGINEER I | **AMAZON** | Bangalore, India — Jan 2022 – Oct 2023

- **Designed a core microservice** utilizing a **multi-tenant schema** to successfully manage the hiring of millions of applicants across India for **Hire by Amazon (HBA)** fulfillment centers.
- **Co-founded the Labor Order & Requisition Management service** as part of the founding engineering team, building critical features for labor order creation and manpower vendor onboarding.
- **Implemented APIs and integrations** for **third-party document generation workflows** (including offer letters and background check consents), while building **Dacia-based audit logs** and custom filtering tools for candidate data exports.
- **Scaled the hiring service and vendor portal** using the **Orchestrator pattern** to enable seamless, bulk candidate creation, while deploying an **automated CI/CD testing suite** to guarantee early error prevention.

BUSINESS TECHNOLOGY ANALYST | **ZS ASSOCIATES** | Pune, India — Mar 2021 – Jan 2022

- **Built Abbott/AbbVie Rx market representative allocation planning dashboards** using Qlik Sense, providing critical analysis of sales rep distribution across various drug portfolios in the US.
- **Deployed robust ETL data pipelines** to aggregate healthcare practitioner data via cyclic updates from HRSA, ensuring strict governance under HIPAA regulations.

EDUCATION

GGSIP UNIVERSITY | B.Tech, Computer Science Engineering | New Delhi, India | **Gold Medalist** — 2017 – 2021
